## **DETAILED ACTION**

### *Pre-Brief conference request*

1. Pre-Brief conference was requested on August 13, 2007; upon further discussion the decision was made to allow this application.

### *Allowable Subject Matter*

2. Claims 1-31 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The instant invention defines a method and system for identifying, delineating, and measuring structures in an image. These types of method/systems are conventional in the art. However, the prior art of record fails to teach receiving image date representing the image; statistically identifying types of structures in the image by applying a maximum likelihood classifier to the image data, the maximum likelihood classifier being a classifier which globally maximizes a discriminant function; forming a statistical description of a structure of interest in the image in accordance with the types of structures identified in step above and an exemplar input which comprises an identification of a seed or an exemplar region in the image; forming a morphological description of the structure of interest in accordance with the statistical description formed in step above and the exemplar input; and forming a structural identification of the structure of interest in accordance with the morphological description formed in step above and the exemplar input. These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. The dependent claims are allowed for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*
